Tianran Kyra Qiu

AI Engineer | +31 0619460860 | tianran.career@gmail.com | linkedin.com/in/tianran-qiu | github.com/tianran-kyra-qiu

PROFESSIONAL SUMMARY

AI Engineer specializing in LLM applications, agent orchestration, and hybrid RAG systems. Experienced in building production-ready AI assistants that connect SQL, vector retrieval, and API workflows to deliver accurate and scalable decision support.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript

LLM & AI: Gemini, OpenAI-style APIs, LangChain, LangGraph, MCP, Prompt Engineering

Retrieval & Data: RAG, ChromaDB, SQLite, MongoDB, Semantic Search, Sentence-Transformers

Productization: Streamlit, REST APIs, Evaluation Pipelines, Git

PROFESSIONAL EXPERIENCE

Tilburg University (Information Systems and Operations Management), Tilburg, NL | *AI Engineer / Research Assistant* | Feb 2026 - Present

- Built a multi-tool AI chatbot using Gemini SDK with dynamic routing between SQL generation and vector retrieval paths.
- Developed a hybrid RAG architecture that improved response relevance for mixed structured and unstructured user queries.
- Implemented streaming chat interfaces and multi-turn memory in Streamlit to support interactive analytical workflows.
- Engineered data-tracing logic for recursive relationship exploration in SQL-backed corporate network analysis.

AIFT (HKSTP Fintech, Digital Solution Provider), Hong Kong, SAR | *AI / Machine Learning Engineer* | Aug 2023 - Jun 2025

- Designed and deployed multi-agent LLM workflows with structured role delegation and JSON-based tool communication.
- Enforced schema-constrained outputs using Pydantic and prompt design for reliable API integrations.
- Built automation pipelines to clean and classify 20,000+ unstructured records for downstream AI use cases.
- Created LLM evaluation loops to continuously improve answer quality, consistency, and latency.

Viasat Inc. (Satellite Internet Service Provider), La Jolla, CA | *Capstone Project* | Sep 2020 - Mar 2021

- Contributed to a predictive analytics pipeline for encrypted traffic behavior analysis with feature engineering and model validation.
- Built Python data extraction scripts to convert raw packet data into model-ready datasets.

EDUCATION

University of Southern California, Los Angeles, CA

M.S. Applied Data Science (STEM), Aug 2021 - May 2023

University of California, San Diego, La Jolla, CA

B.S. Data Science (STEM), Provost Honors, Sep 2017 - Mar 2021
